

THE HOAD LINE

to practise
following the map

map-reading training - to appreciate the map better - how things are shown
practice making a 'picture' of what lies ahead
draw a wiggly line, go out and try to follow it as closely as you can
always keep the map 'set' or orientated with the ground
to do this you will have to turn the map as you turn
use the compass to check that the map is set (north lines on map should point the same way as the compass north needle)
